Quick question — tap your answer

Before today, have you ever used your phone to advertise something you sell?

B) I have tried it once or twice

Good — you have already started. Today we are going to make it official.

How to read this document. Each section shows what the chatbot sends, what the participant taps or types, and how the bot responds to each choice. Messages are numbered in order. Bot responses branch based on the participant's answer.

01 The Hook: To earn attention in first message

MSG 1 Bot sends · Hook question

👋 Quick question — tap your answer:
Before today, have you ever used your phone to advertise something you sell?

A Yes, I post on WhatsApp Status or social media

B I have tried it once or twice

C No, I only use my phone for calls and chats

→ User taps A

That is great! 🙌 Today you are going to take that one step further and create something even more powerful. Keep going 🙌

→ User taps B

Good — you have already started. Today we are going to make it official 😊 Keep going 🙌

→ User taps C

Perfect. Then today is exactly the right day to begin. What you are about to learn takes less than five minutes — and it is free. 🎉 Keep going 🙌

02

The Core Message

two messages, one personal moment

MSG 2

Bot sends Core idea

Here is something most people do not realise:

The phone you use for chats every day can also run your business.

Your phone can help you:

- 📺 Advertise your products
- 📦 Receive orders
- 💰 Collect payments
- 📝 Keep business records
- 💬 Talk to customers faster

You already have the tool in your hand.

Today you are learning how to use it better. 💪

MSG 3

Bot sends Personal input

Before we go further — tell me:

What do you sell?

Type it here 📝

(Example: fabrics, food, shoes, provisions, pepper...)

→ **After user types their product**

Perfect. 🙌 Hold that thought — because by the end of this lesson, you are going to create a real digital advert for exactly that. Let me show you how it works first. 📌

03

Real-Life Example

To make it relatable

MSG 4

Bot sends Story

📺 Meet Mummy Chisom.

Mummy Chisom sells slippers and shoes in the market.

One morning, she snapped a clean photo of her new stock and posted it on WhatsApp Status with the price and her number.

Before afternoon, a message came in: "Do you still have size 40?"

That customer had never visited her shop before. She found Mummy Chisom through a status post.

One photo. One post. One new customer. 🎉

MSG 5

Bot sends Reflection question

Now think about your own business for a second.

Have you ever missed a sale because a customer did not know what you had in stock?

A Yes, this has happened to me before

B Maybe — I am not sure

C No, my customers always know what I have

→ User taps A

That is exactly the problem WhatsApp Status solves. 📱 When you post your products, customers know what is available before they even reach you. Let us fix that today. 🙌

→ User taps B

Even if your current customers know your stock, imagine reaching people who have never visited your stall before. That is what posting online can do for you. Let us get started. 🙌

02

The Core Message

Hands-On Practice

Create Your First Business Flyer

Seven steps. Delivered one message at a time. Each step waits for the participant's confirmation before the next arrives.

MSG 6**Bot sends Readiness check** **TODAY'S TASK**

You are going to create your first simple business flyer using your phone.

This is not a test. There is no wrong result.

Just follow the steps one at a time.

Are you ready?

A Yes, let us go! 🚀

B I need a few minutes to get ready

→ User taps A

Let us go! 🎉 Here is your first step 📌

→ User taps B

No rush at all. Take your time. When you are ready, tap "Let us go" and we will start together. 😊

MSG 7**Step 1 of 7 · Mobile data****01** **Turn on your mobile data or Wi-Fi**

Look at the top of your phone screen — do you see the data or Wi-Fi icon?

To turn on data: swipe down from the top of your screen and tap the Wi-Fi or Data icon.

A Yes, I am connected ✅

B I am having trouble connecting

→ User taps A

Perfect. Let us move to Step 2 📌

→ User taps B

Try this: swipe down from the top of your screen and tap the Wi-Fi or Data icon to turn it on. Still having trouble? Ask your facilitator to help. Tap "I am connected" when ready. 😊

MSG 8**Step 2 of 7 · Take a product photo****02****📷 Open your camera and take one clear photo of something you sell**

Take your photo now, then come back here.

- ✓ Good light — stand near a window or outside
- ✓ Clean background — no clutter behind the product
- ✓ Get close enough so the product is easy to see

A Yes, I have my photo ✓**B** I need help with this step**→ User taps A**

Excellent! 📷 That photo is your raw material. Moving to Step 3 📌

→ User taps B

Open the camera icon on your phone home screen. Point it at one product and tap the white circle button to take the photo. Tap "Yes, I have my photo" when done.

MSG 9**Step 3 of 7 · Open Canva****03****🎨 Open the Canva app**

Do you have Canva on your phone?

Canva is free to download. Go to your Play Store (Android) or App Store (iPhone), search Canva, and download. It takes about two minutes.

A Yes, I have Canva**B** No, I need to download it**→ User taps A**

Great — open it and go to Step 4 📌

→ User taps B

No problem at all. Go to your Play Store (Android) or App Store (iPhone). Search: Canva. Download the free version. Tap "Yes, I have Canva" when it is ready. 😊

MSG 10**Step 4 of 7 · Choose a template****04** **Inside Canva, search for a WhatsApp flyer template**

Tap the search bar at the top and type: **WhatsApp flyer**. Scroll through the templates and choose one you like.

Look for a template with space for one image, a headline, and a price. Simple and clean works best. Avoid ones crowded with too much text.

A Yes, I have one ✓**B** I am not sure which one to pick**→ User taps A**

Perfect choice! Every template works — trust yourself. 🍷 Moving to Step 5 📌

→ User taps B

Pick the one that feels right. Simple is always better. Tap "Yes, I have one" when ready.

MSG 11**Step 5 of 7 · Add your photo****05** **Replace the sample image with your own product photo**

Tap the search bar
Tap on the sample image in the template. Look for the option that says Replace or Upload. Select the photo you took in Step 2.

A Yes, my photo is on the flyer ✓**B** I need help with this**→ User taps A**

You are doing amazing! ⭐ Almost there. Step 6 📌

→ User taps B

Try this: tap directly on the image in the template. A menu should appear. Look for the word "Replace" or an upload icon. Then go to your gallery and select your photo. If still stuck, ask your facilitator. Tap "Yes, my photo is on the flyer" when ready.

MSG 12**Step 6 of 7 · Add your text****06**

👉 **Tap on the text in the template and change it to your own information**

Your flyer needs three things: what you are selling, the price, and how to reach you.

Example: "Fresh Fish Available Today — #3,000. Call or WhatsApp: 0801 234 5678"
Use your own product and your own number.

A Yes, my flyer is ready ✅

B I need a moment

→ **User taps A**

This is your first digital advert. Let that land for a second. 🎉 Last step 📌

→ **User taps B**

Take your time. Change just three things: product name, price, and your WhatsApp number. That is all you need. Tap "Yes, my flyer is ready" when done.

MSG 13**Step 7 of 7 · Download and share****07**

📥 **Download your flyer and send it to one trusted person**

Look for the download arrow or "Save" button at the top of the Canva screen. Then open WhatsApp and send the flyer to one friend, family member, or customer. **Just one person. That is enough for today.**

A Yes! I sent it 🎉

B I saved it but I am not ready to send yet

C I could not complete all the steps today

→ **User taps A**

You just created and shared your first digital business advert. Using your own phone. For free.

That is not small. That is exactly how it starts. Mummy Chisom's first customer came from one status post. Yours might come from this flyer.

Keep it. Post it on your WhatsApp Status too when you are ready. 📌

→ **User taps B**

That is completely fine. You did the hard part — you made it. When you feel ready, send it to one person. It does not have to be public. Just one person to start. You have got this. 🙌

→ **User taps C**

No problem at all. You made progress today and that is what matters. Your facilitator can help you finish the flyer at the next session. The lesson does not stop here — keep going. 🙌

05

Knowledge Check

🧠 One quick question before we close

Which of these is a business use of a smartphone?

A Sending product photos to customers

✓ **Correct**

B Using your phone torch

C Increasing your ringtone volume

D Charging your battery

→ **User taps A (Correct)**

🎉 Correct! Sending product photos, posting on WhatsApp Status, and updating customers — these are all business uses of your phone. And you did not just answer correctly today. You actually did it. See you in the next lesson. 🙌

→ **User taps B, C or D**

Good try 😊 Torches, volume, and charging are all basic phone functions — useful but they do not help your business grow. The correct answer is A. Using your phone to send product photos and reach customers — that is business. And that is exactly what you practised today. See you in the next lesson. 📱

06

Voice Note Summary Recording Script · 30–35 seconds

"Well done for finishing today's lesson. Your phone is more than a device for calls and chatting. With simple apps and small digital skills, it can help you promote your products, reach new customers, and grow your business. You do not need to learn everything today. Start small. Practise often. And your confidence will keep growing. If you made your flyer today — you have already started. See you in the next lesson."
